-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 5, 6, 7, 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The above claims all depend on claim 1 but call for a resistive material to be either thick film or resistive wire. Since claim 1 has already required the resistive material to be thin film the scope of the claims is indeterminate.

Claims 10, 23-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The above claims cite ranges but depend on claims also citing ranges. The claims present a range within a range and are indefinite since it is not clear which range is being claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3742

Claims 1-2, 4, 11, 12, 14-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Katsuda et al. (US 5644866).

Katsuda discloses, *inter alia*, a heating device comprising a laminar of polymer resin film material having PTC characteristics applied to laminars of insulating material, a rechargeable battery and a wick having a heating means attached in proximity to the wick.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9, 13, and 19-22, and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Katsuda et al. (US 5644866).

Katsuda discloses, *inter alia*, a heating device comprising a laminar of polymer resin film material having PTC characteristics applied to laminars of insulating material, a rechargeable battery and a wick having a heating means attached in proximity to the wick. Katsuda does not explicitly disclose the specific design options as claimed by applicant in claims 9, 13, 19-22 and 26 however such design considerations and modifications are generally well known in the art and it would have been obvious to one of ordinary skill in the art to make such modifications to the Katsuda device.
